

BHARAT PARMAR

Self-Taught Software Developer

Location: Morbi, Gujarat, India (open to relocation, especially Ahmedabad)

Email: bharatparmar.dev@gmail.com | Phone: +91 99091 52535 | Portfolio: bharatparmar.vercel.app

LinkedIn: linkedin.com/in/bharatparmar-dev | GitHub: github.com/bharatparmar-dev

PROFESSIONAL SUMMARY

Self-taught software developer with 10+ years of hands-on, computer-based business operations experience. Progressed from Excel and VBA automation to C#, SQL Server, and full desktop application development, entirely by solving real problems at work. No formal computer science degree; proven ability to research, learn, and ship working software independently, including diagnosing and building a custom Windows camera driver that resolved a live production issue after a Windows update broke business-critical software.

TECHNICAL SKILLS

Core: C#, SQL Server, Windows Forms (.NET), Python, VBA

Web (AI-guided build): Next.js, React, Tailwind CSS, TypeScript basics

Tools & Practices: Git (AI-assisted workflows), Excel Automation, Windows Networking & Troubleshooting

AI-Assisted Development: Claude, ChatGPT, Gemini, AI coding agents

SELECTED PROJECTS

Portfolio Website — *Next.js, Tailwind CSS, Vercel*

- Designed and built a complete, production-deployed portfolio website by hand, including a working backend contact form with spam protection, SEO, and accessibility features.

Custom Virtual Camera Driver — *C#, Windows Driver Development*

- Diagnosed a production camera-access failure caused by a Windows update; researched and built a custom driver-level fix that resolved the issue in a live business environment.

JewelX — Inventory Management System — *C#, Windows Forms, SQL Server*

- Rebuilt most of the core functionality of a commercial inventory management system from scratch without access to source code, covering inventory tracking, billing, and customer management.

PROFESSIONAL EXPERIENCE

Office Administration, Inventory Management & Self-Taught Developer

Samrat Jewellers | March 2021 – Present

- Manage the full technical and operational backbone of a jewellery business: inventory across many product categories, daily billing, stock verification, staff attendance and payroll, and network/hardware troubleshooting.
- Independently diagnosed and resolved a production issue after a Windows update broke camera integration, building a custom driver-level fix still in use today.
- Built internal automation tools (VBA/Excel, then C# and SQL Server) that became the foundation of a self-taught software development skill set.

Cashier

Reliance Smart | August 2020 – February 2021

- Handled high-volume retail transactions during the launch of Morbi's first shopping mall, becoming the team's top-performing cashier during peak festival periods.

Marketing & Inventory Operator

Jalaram Enterprise | August 2018 – March 2020

- Managed digital stock records and customer ledgers for a wholesale mobile accessories distributor, combining field sales with computerized inventory tracking.

Billing & Compliance Executive

Ceramic Billing Company | May 2018 – August 2018

- Generated sales and E-Way bills for a ceramics manufacturing business under tight operational deadlines.

Computer Operator / Office Executive

Wadhara Tours & Travels | September 2016 – March 2018

- First employee handling complete computer operations for a newly launched travel agency, including ticket booking and government ID services, while training all employees who joined after.

EDUCATION

Higher Secondary Certificate (HSC) — *Commerce [2016 - 2018]*
